

Army Container Asset Management System (ACAMS)

1. ACAMS is the DOD database system for Container Management, directed for use by all Military Services. All Unit CCO's are required to maintain ACAMS as their Container Management System.
2. ACAMS is a secure, web-based system DOD designated as the DOD-wide system of record to provide life cycle management and control of all Marine Corps owned and leased container assets. The ACAMS application has been customized to meet the functional requirements of container managers worldwide to account for control and provide visibility of container assets and is used to accomplish statutory and regulatory report requirements (i.e., container reports, equipment Inspection and maintenance worksheet, and physical inventory reports). ACAMS provides the Marine Corps with capabilities to centrally manage procurement, registration, inspection, maintenance, status, location, ownership, and special characteristics of intermodal assets (containers, quadcons, etc.). ACAMS maintains a complete history of events associated to each intermodal asset and provides robust report capability, summary, and detailed data for all levels of Marine Corps management. ACAMS hosts the DOD ISO registry of containers and is also used to capture the Biennial DOD Container Inventory.
3. For Unit ACAMS access, visit the following site:
 - a. <https://zeus.tobyhanna.army.mil/home/request.asp>
 - b. Follow the instructions on the screen for personnel information
 - c. Select "Marines" and click submit
 - d. Once you submit your information on the above site, you will receive an email from ACAMS with follow-on instructions and documents to establish the Unit ACAMS account
4. ACAMS POCs and Primary Help Desk personnel:
 - a. Tanya Hartshorn, ACAMS Lead Technician
Email: tanya.a.hartshorn.ctr@mail.mil
Comm: 570-615-9410, DSN 795
 - b. Albert Edwards, ACAMS Lead Technician
Email: albert.h.edwards.ctr@mail.mil
Comm: 570-615-9114, DSN 795
 - c. The ACAMS HELP DESK HOTLINE is 1-800-303-0926
